SOUTHERN AREA

Comments

Elevated freight costs, domestic demand squeezed by inflation and economic uncertainty, and apprehensive overseas customers have helped create a hardwood market that is quite chilly in the South. “The market is absolutely flat,” a Southern sawmill operator said. “We have the exact same numbers as last month. People are tentative; it’s this war and the price of diesel that’s doing it.”

Contacts say that the best performers in the region right now are White Oak and Ash, though that appears to be relative given how static things are. International demand remains consistent but is hardly lighting anyone’s hair on fire. “It feels like people are waiting for this war to end before really spending money again,” the sawmill operator concluded.

ASH: Temperatures across the Southern region hit highs usually reserved for later in the summer this week, and weather was relatively dry. Consequently, logging of lowland species like Ash continued at a steady clip. Markets for both green and kiln dried Ash are well balanced, with production capably accommodating demand. Reported prices produce few changes to the published figures in this issue, namely an increase to the list price for green 8/4 #2A and decreases to the low ends of the ranges for kiln dried 8/4 #1C. “Ash, especially the thick stock, was decent for a long while, but it has fallen off over the last few weeks,” one sawmill contact said.

SOFT MAPLE: After repeated increases in green WHND Soft Maple prices of late, the surge appears to be over. Interest has not faltered, according to end users and sawmill operators, but supply and demand are closer to equilibrium.

#2A&3A OAK: It has been nearly two months since reported prices drove changes to the listings for green #2A&3A Oak, illustrating a market that is well balanced. While there are no shortages of Red and White Oak logs in the South, production is down across the board, and homes for #2A&3A Oak are fewer and farther between than they have been for some time. Residential and trucker trailer plants are still not buying in big numbers, while crosstie quotas mean the longstanding alternative to #2A&3A production remains more closed than open.

RED OAK: From a price perspective, the market for Red

Oak in the South is close to static at this time. A veteran sawmill operator told HMR/Fastmarkets he is receiving few calls for the species, in both the green and dry varieties. “It’s absolutely terrible,” he said. “No one seems to want it.” That said, many sales contacts describe business as consistent or fair. A slight drop in demand sees the list price for green 4/4 #1C fall this week, while international interest pushes the listings and lower ends of the ranges for kiln dried 4/4 #1C upward.

WHITE OAK: Markets for green White Oak are not performing well in the South. Prices obtained in late May necessitated increases to the 4/4 #1C&Btr listings in last week’s issue, but demand and pricing have since cooled off. All the listings remain intact. On the kiln dried side, slowing export demand for White Oak results in decreases to the upper ends of the ranges for 4/4 Fas, 5/4 #1C, and 5/4 #2A. The listings for 5/4 #1C also retreat. The lower ends of the ranges for 4/4 #2A mark the only upward price movements for White Oak this week.

POPLAR: Though the market for green Poplar has cooled, contacts say there has been solid interest in kiln dried Poplar lately. Outside of some thick-stock items, this isn’t reflected in reported prices, however. Prices in observed activity lift the 6/4 #1C&Btr listings but leave all the other published figures in place.

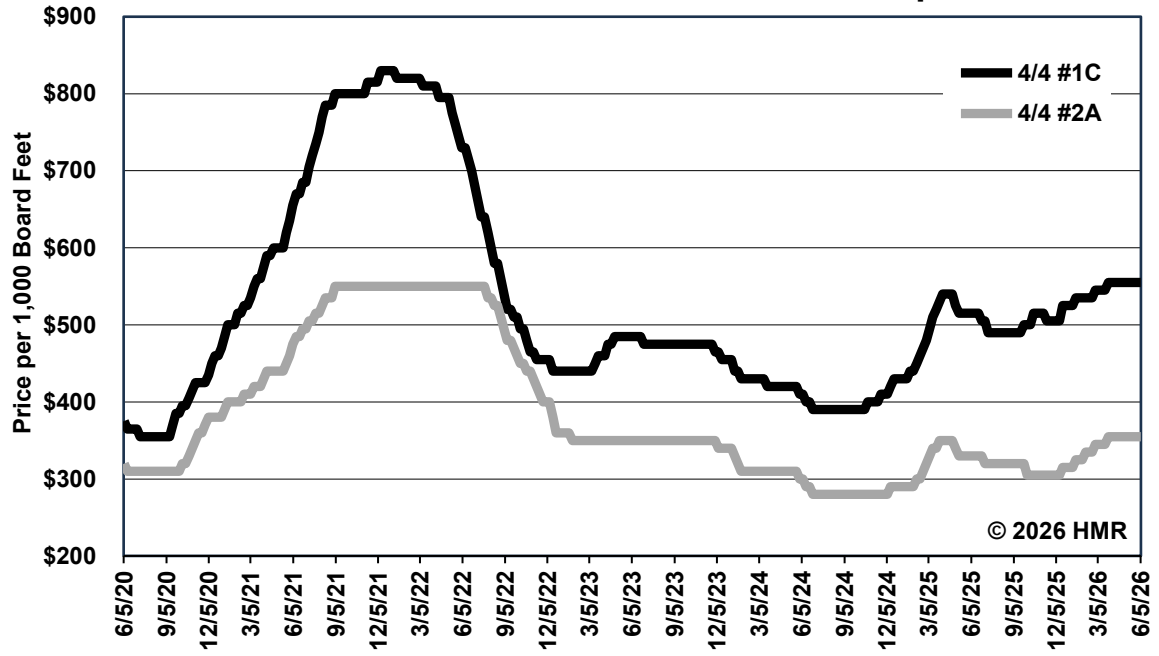

FRAMESTOCK, CANTS, TIES, & BOARD ROAD: Like #2A&3A Oak, most markets for Southern industrial items are rather quiet. Reports show recent price movement for framestock has come to an end.

Meanwhile, crosstie quotas are prevalent on both sides of the Mississippi River, although observed transaction prices for ties have not changed much for several weeks.

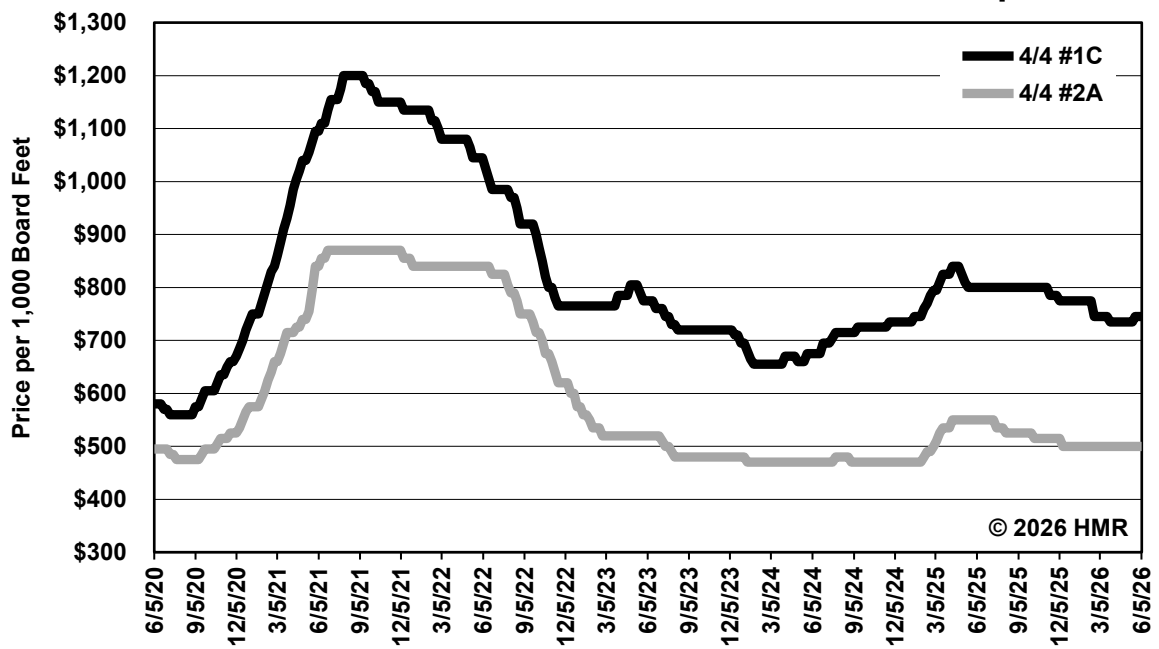

Supply and demand for pallet cants are well balanced despite a bit more production resulting from the decline in tie output. Cant prices hold at the listing or within the range.

A reported increase in industrial projects in the region is likely behind the only change in industrial prices this week, as the upper end of the range for board road rises. Contacts indicate mat timbers have been moving well for sawmills that have established connections to that market.

Comments

Market participants returned from the Memorial Day holiday to a tepid business environment that is hampered by high fuel prices, rising inflation, and uncertainty over the US war with Iran. Despite the war, the Federal Reserve Bank of Atlanta’s GDPNow forecast predicts 3.0% growth in Q2. A return to pre-war economic conditions can’t happen soon enough for contacts who have watched sales and profits cool as it has continued.

Sawmills aren’t flush with logs like they were a month ago, but log decks are still decent. Contacts describe fair green and kiln dried lumber sales, with demand strongest from the distribution yards and moulding/millwork sectors. Demand for #2A&3A Oak is higher from residential flooring plants than from truck trailer flooring manufacturers. Concerns remain about slow tie sales potentially driving up pallet cant production but reported cant prices don’t reflect those sentiments.

ASH: Production and shipments of this species are well balanced, especially for sellers that have established customers in Europe and Asia. Overall resource scarcity caused by the Emerald Ash Borer is lending stability to pricing. Green prices are stable, with activity keeping all the published figures intact. Most reported kiln dried prices also hold the line for sellers shipping globally. The only

changes for kiln dried stock lift the listings for 8/4 Fas.

BASSWOOD: Market circumstances for Basswood are largely unchanged, with limited demand absorbing limited production. At times, however, supplies fall below the market’s finite needs. This is the present situation, with producers obtaining slightly higher prices for kiln dried 4/4 Fas. Those listings rise for a second straight week, but all other Basswood figures, green and kiln dried, are unchanged.

CHERRY: Continued interest in this species by concentration yards filling orders for China adds upward pressure to green North Central 5/4 through 8/4 #1C&Btr prices. Those listings are raised accordingly. The kiln dried matrices have the most upward movement of any species in this issue. Information requires increases to the 5/4 Fas listings and 5/4 #2A listings and ranges in each subregion. The 5/4 #1C figures and high-side ranges for 4/4 #1C also advance in the North Central area, as do the Appalachian 4/4 Fas listings and 4/4 #2A range numbers.

HICKORY: Contacts continue to report a good pace of business for Hickory. Green material is moving steadily to flooring plants, and kiln dried stocks are selling at a

(Continued on Page 9)

APPALACHIAN COMMENTS (Cont'd from Page 7)

decent clip to a mix of domestic and foreign markets. Supplies have largely aligned with demand in recent weeks, following shortages that pushed green prices higher from mid-April through mid-May. Kiln dried supply and demand are also closely aligned. Incoming price reports prompt increases to the low-end ranges for kiln dried 4/4 Fas. All other reported prices are consistent with the listings or within the ranges.

HARD MAPLE: Producers have no issues moving brown Hard Maple but continue to list #1&2 White among their worst-moving items. One contact reported taking \$50/MBF less than his typical price for kiln dried #1&2 White 4/4 Fas just to get rid of it, fearing steeper concessions if it sat longer. Some yards report that Hard Maple’s share of total production is rising at sawmills, because competition for Hard Maple logs for export doesn’t rival that for Oak and Walnut. Meanwhile, end users aren’t looking to boost receipts during this period of economic uncertainty. Changes to the green and kiln dried figures in prior weeks have the listings and ranges in order in both color sorts.

SOFT MAPLE: There’s more interest in Soft Maple than Hard Maple, but that interest is described as “okay” rather than strong. Demand for brown material is good, however, aligning with activity for its Hard Maple counterpart. Green Sap&Btr and Unselected 4/4 #2A Soft Maple have been thorns in the sides of several sawmills for months,

with some contacts previously describing them as nearly unsellable. However, those comments have disappeared of late, and newly reported prices warrant increases to the green 4/4 #2A listings in each color designation. The kiln dried Unselected 8/4 Fas listings also notch gains.

#2A&3A OAK: Residential flooring plants are sufficiently stocked with #2A&3A Red Oak and White Oak for the current pace of production, which is generally not as strong as expected for this time of the year. Prices in observed transactions between sawmills and both residential and truck trailer flooring plants haven’t changed much in recent weeks, holding all #2A&3A Red Oak and White Oak and #2A Alone Red Oak listings steady. Despite recent price stability, the lack of sustained competition for #2A&3A Oak from other sectors remains a concern for sawmills.

RED OAK: Drying operations are experiencing fair business for this species across most grades and thicknesses, with orders for 4/4 coming in steadily from China. Contacts report improving domestic demand, following sluggish sales in early spring. For now, however, only the low-end ranges for 4/4 Fas are raised. Conversely, exporters note difficulty moving thicker-stock Red Oak, partly because the US war against Iran and associated shipping woes are reducing sales to Middle Eastern countries that typically purchase thicker stock. The low-end ranges for 8/4 Fas and 8/4 #1C fall back. Most green prices are hold-

(Continued on Page 11)

APPALACHIAN COMMENTS (Cont'd from Page 9)

ing steady, though the listings for 4/4 #1C&Btr edge down.

WHITE OAK: Just when it appeared green and kiln dried White Oak prices were finding their floors, newly reported information keeps the downward trends going. White Oak moves well overall, with several contacts continuing to list it among their best-moving species. However, excess supplies relative to demand lower the listings for green 4/4 through 8/4 Fas&1f and 4/4 #1C. Upper-grade weakness is also most prevalent on the dry side. Observed prices warrant decreases to the listings and ranges for 4/4, 6/4, and 8/4 Fas. The range numbers for 5/4 #2A also decline. Following this week’s \$75 reduction, the published net listing for kiln dried 4/4 Fas White Oak is the lowest since November 2023 and fully \$1,425 below the record \$5,125 price last observed in August 2024.

POPLAR: Concentration yards and secondary manufacturers are having no issues sourcing green Poplar since sawmills started working down their robust Poplar log decks several weeks ago. Contacts report better demand for the upper than the lower grades, as has been the case all year. However, a clear downward trend in reported green prices lowers the listings for 4/4 through 10/4 Fas&1f. Kiln dried supply and demand are in equilibrium this week, however, resulting in no changes to the listings or ranges.

WALNUT: This species is selling at a decent pace domestically and internationally. Reports suggest green yard inventories have been whittled down enough to prevent price depreciation for a second consecutive week, following steep declines in prior weeks. Demand for kiln dried stock is similarly aligned with supply. No changes are warranted to any kiln dried figures.

FRAMESTOCK, CANTS, TIES, & BOARD ROAD: Demand for solid hardwood framestock is lethargic from upholstered furniture manufacturers, which continue to struggle with lackluster finished goods sales. Last week’s changes have the framestock ranges in order.

Markets for wooden pallets are fair for some survey respondents and performing well for others. Demand is keeping total cant production shipped, even as reduced tie output has pushed more material from log centers into cants. Reported prices keep the cant listing and range intact.

Tie buyers are reportedly implementing quotas for certain sawmills that previously hadn’t had their shipments limited. Those that have been on quota for a while continue to report very limited purchasing. No changes are required to the ranges for 7x9 crossties.

The few reported board road prices are indicative of scant interest. The reported prices are consistent, however, resulting in no changes to the listing and range numbers.

Comments

Market sentiment regarding the major species in the Northern region is fairly consistent with recent weeks. Kiln dried Hard Maple is still the star of the market, with several contacts noting that #1C items are moving especially well. White Oak prices remain under downward pressure because of heavy supply, though price declines are slowing. Red Oak is moving well domestically and for export, and prices are firm to slightly higher.

A recent shift has been noted in the Soft Maple market, however, with green Unselected prices coming under

pressure because of plentiful supply. For kiln dried Soft Maple, Fas is still moving okay in Sap&Btr and brown, especially loads with decent lengths, though some producers have noted a recent slowdown for those items compared with April and early May.

ASH: The Emerald Ash Borer is keeping supplies of Ash tight in the Northern region, though some producers are struggling to move the species domestically. One producer

(Continued on Page 14)

NORTHERN COMMENTS (Cont'd from Page 13)

in Wisconsin recently stopped cutting 4/4 Ash and switched to 5/4 because it was a struggle to move the 4/4 lumber. The same producer noted that demand for Ash is highly length specific, with buyers showing much more interest in longer boards. Sellers involved in export markets are having a much easier time moving the species. A different producer in Wisconsin said he's easily moving #1C&Btr lumber to Europe and China, while #2A and #3A are selling well to Vietnam, though buyers in those countries are shying away from loads with high percentages of 8-foot and shorter lengths. Higher reported prices necessitate slight increases to the kiln dried 4/4 #2A listings and low-end range numbers.

ASPEN: A producer in Northeast Canada listed Aspen as one of his bestsellers this week. Comments from contacts in the Upper Midwest have been more mixed; one listed the species as a worst-seller, while others have described demand for the species as "decent." Prices for Aspen, both green and kiln dried, have been edging higher throughout this year, largely because of tight supply, as many mills are avoiding cutting the species. The green 4/4 Fas&Sel listings are raised in this issue. Prior adjustments have all other listings and ranges in order.

BASSWOOD: Comments on Basswood have been mixed from producers in the Northern region. Some report a sluggish market, especially for 4/4. Others have seen a recent pickup in demand for 4/4 and 5/4; one producer in Michigan reported selling out of 4/4 and 5/4 Basswood toward the end of May. Prices are length-dependent, though unlike most species, 8-foot boards are reportedly selling at a premium over 10- and 12-foot boards—one seller noted a \$75 spread between the two. Thick-stock 9/4 Basswood is said to be moving fine at steady prices. Information received this week leads to increases to the kiln dried 9/4 #1C listings. A lower trading range is noted for kiln dried 5/4 Fas, while the low-end range numbers for 5/4 #1C and #2A are raised.

BIRCH: No changes are observed in market conditions or prices for Birch this week. A producer in the Upper Midwest said that markets for the species are "hanging in there." Buyers are mainly interested in Sap&Btr or Red colors, with limited demand for Unselected stock, according to sellers.

HARD MAPLE: Kiln dried Hard Maple continues to move well for producers in the Northern region, and most market participants surveyed this week describe supplies

of the species as "tight." Several contacts highlight #1C as the hottest item, though most producers are having little issue moving all grades. While the species is moving well and supplies seem to be relatively low, price increases have slowed in recent weeks after sizable gains in April. Only minor bumps are noted in reported prices, necessitating slight increases to the kiln dried 4/4 Fas listings in both color sorts. One Northern producer told HMR/Fastmarkets that he plans to aggressively purchase Hard Maple logs in the coming months in the expectation that kiln dried prices will remain firm during the summer.

SOFT MAPLE: Prices for Unselected green Soft Maple remain under pressure, as sawmills are "flush with logs," according to a producer in Michigan. The Fas&Sel listings extend last week's declines across all thicknesses, and all the #1C listings also retreat. Green Sap&Btr listings, however, hold steady amid consistent reported prices. For kiln dried stock, some sellers are experiencing a slowdown in demand for Sap&Btr Fas lumber. A mill operator in Wisconsin said his customers are bidding aggressively lower for those items, and the same mill is struggling to move #1C and #2A. Contacts continue to report that brown Soft Maple is moving well in Fas, though buyers mostly want longer boards. Information received this week necessitates reductions to the kiln dried Sap&Btr 4/4 and 5/4 Fas listings and range numbers, as well as the 4/4 #1C listings. For Unselected, the 4/4 Fas and #1C listings and ranges fall.

RED OAK: From a producer's perspective, sentiment about the Red Oak market is mostly positive in the North. Green and kiln dried prices are maintaining their upward trends, and contacts indicate the species continues to move well both domestically and for export. A seller in Wisconsin said he recently sold out of kiln dried #2A Red Oak and has been moving his Fas and #1C without issue. Contacts surveyed in the Upper Midwest in recent weeks have described demand from the residential flooring sector as "good," which is supporting demand for green #2&3A lumber. Various green listings are raised this week on higher reported prices: 5/4 and 6/4 #1C as well as 4/4 and 5/4 #2&3A and 4/4 #2A Alone. For kiln dried, the 4/4 and 5/4 #2A listings are raised. Looking ahead, many contacts believe the recent price runup could be nearing an end, as a seasonal bump in Red Oak production is forthcoming in the region.

WHITE OAK: After continual declines throughout the second half of last year and the first quarter of this year, White Oak prices in the Northern region have largely stabilized since late March. Producers say the species is

Prices in this matrix are for kiln dried lumber **measured after kiln drying (“net tally”)**. The first figure listed for each grade and thickness is the predominant index price; figures in parentheses are the prevailing range of index prices. Bold figures indicate change. Prices published in **Hardwood Market Report** are presented only as a guide. See statement on back page. © 2026 *Hardwood Market Report*

currently moving better than at the start of the year, and this increased activity has helped relieve the persistent downward pressure on prices. However, prices for upper grade White Oak have yet to find a floor and continue to tick down across all regions. The green 4/4 through 6/4 Fas&Sel listings are decreased on lower reported prices. Producers that have 9-foot-and-longer loads or stocks with minimal sapwood are able to sell lumber for prices well above the published listings, and some of these producers have reported a recent bump in prices for their Fas items.

PALLET LUMBER, CANTS, TIES, & BOARD ROAD:
Sawmills have seen an uptick in demand for pallet lum-

ber, with nearly all Northern contacts surveyed in the past two weeks describing interest from this sector as “good.” However, no changes are in order for the pallet lumber listings or ranges following last week’s increases for random-width 4/4 and 5/4. The cant listing and range also remain intact.

Business conditions for railroad ties are little changed, as treaters are maintaining strict purchasing quotas at steady prices for most suppliers.

Board road shipments are slow for producers in this region, with prices unchanged.

OAK STRIP FLOORING

Figures in the Appalachian and Southern area columns are estimates of manufacturers’ **predominant** prices for unfinished Oak strip flooring; prices in the other column are estimates of **prevailing industry ranges** of manufacturers’ prices. Variations in prices are due, in part, to differences in freight, the nature of markets, volumes ordered and shipped, etc. Prices are for truckload quantities graded in accordance with rules or comparable standards set forth by NOFMA. **Prices are in US Dollars per square foot (SF) and are net of dealer discount fees and commissions.** Figures in bold print signify price changes. Prices in **Hardwood Market Report** are presented only as a guide. See statement on back page.

Census Bureau data for US new home sales reveal a slight shift away from higher-priced homes to more low- and mid-priced homes, a change that could be lessening demand for hardwood flooring. Of all units sold in March, 52% were priced below \$399,999, six percentage points above the percentage in full-year 2025. Homes that sold for \$300,000 or less accounted for 20% of total March sales, the highest share in four months.

Conversely, the share of homes sold in the \$500,000 to \$799,999 range has been slipping. In January, that distribution tallied 25% of total sales. However, the share dipped to 21% in February and 20% in March, with the March share five percentage points below the percentage for full-year 2025. Meanwhile, the percentages of homes selling for \$800,000 to \$999,000 and over \$1,000,000 haven’t appreciably changed.

This constitutes a shift in new home sales toward less expensive units and away from homes costing between \$500,000 and \$799,999 in a housing market hampered by an ongoing affordability crisis. It reflects the course some homebuilders said they would take to generate interest:

offer homes at lower price points.

Homes costing \$1,000,000 and above are more likely to have high-end hardwood fittings, supporting demand for solid hardwood flooring. The demand pull from homes in the second– and third-highest pricing tiers has been wavering amid rising use of lower-cost alternative “wood look-alike” products. Homes in the lowest price tiers typically don’t utilize hardwood flooring because cost savings are high on those buyers’ priority lists. This shift could help explain why business for some flooring manufacturers has tapered off at a time when demand for flooring is usually increasing.

Looking at pricing trends, relatively large declines for the 2¼” and 3¼” Sel&Btr White Oak figures over the past few weeks have those listings and ranges in order in this edition. However, information warrants increases to the listings for Southern 2¼” Sel&Btr Red Oak, No. 1Com Red Oak, and No. 1Com White Oak. The low-end range for 3¼” Sel&Btr Red Oak also rises, but the listing for Appalachian 3¼” No. 1Com Red Oak is reduced on lower reported pricing.

NHLA Annual Convention & Exhibit Showcase September 16-18, 2026 | Cleveland, Ohio

EVENTS

**MORE THAN A CONVENTION—
IT'S A FULL EXPERIENCE.**

From keynote sessions to industry panels and exclusive events, every moment is built to move your business forward.

EXHIBITORS

**SEE WHAT'S SHAPING
THE FUTURE OF HARDWOOD.**

Walk the floor. See innovations firsthand. Talk directly with the companies pushing the industry forward.

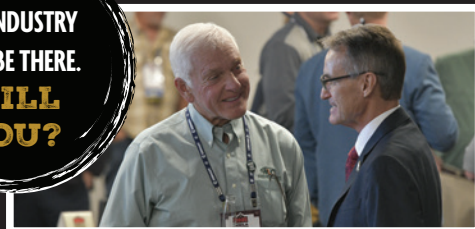

NETWORKING

**THIS IS WHERE
RELATIONSHIPS ARE BUILT.**

The conversations you have here don't happen anywhere else.

**THE INDUSTRY
WILL BE THERE.
WILL
YOU?**

**EVERY YEAR, THE PEOPLE WHO SHOW UP LEAVE
AHEAD! REGISTER TODAY BY SCANNING THE QR CODE.**

National Hardwood Academy

EIGHT WEEKS. ONE SKILLSET. A LIFETIME OF OPPORTUNITY.

For more than 75 years, the NHLA Inspector Training School has been the starting point for successful careers in the hardwood industry—equipping students with the skills, confidence, and connections to thrive.

In just eight weeks, you'll gain hands-on experience in lumber grading, species identification, measurement, and NHLA rules—the foundation of the global hardwood marketplace. Whether you're entering the industry or leveling up your career, this program prepares you for high-demand roles across the supply chain.

Upcoming 8-Week Session

September 21 – November 13, 2026

NHLA Headquarters (Memphis, TN)

- Train in real-world environments, learn from industry experts, and join a network of graduates who are shaping the future of hardwood.
- With a 98% job placement rate, the path forward isn't uncertain—it's proven.
- Turn eight weeks into a career that lasts a lifetime.

Apply now by scanning the QR code.

Fastmarkets

The US hardwood industry has traditionally struggled to market itself to consumers. The ongoing decline of the industry, however, has spurred the formation of numerous organizations focused on promotion.

In the June *HMR Executive*, Michael Connolly profiles several groups dedicated to promoting the industry and reversing its decline.
