SOUTHERN AREA

Comments

Last week, *HMR/Fastmarkets* made its way to the annual NHLA Convention in Cleveland. While there was not a large contingent of Southern market participants in Ohio, they found that those from other hardwood-producing regions are facing many of the same challenges.

Along with the cool market for grade lumber and ongoing issue of logs heading to China and Vietnam, historically high diesel prices and international trade disruptions caused by the US war with Iran and ongoing trade disputes were constantly raised in conversation. "Driving up here, I saw all these gas stations putting up prices," one Southern contact told *HMR/Fastmarkets*. "It's the result of this war and it's hurting a lot of people."

On the positive side, multiple contacts pointed to the strong market for Southern board road. Several large long-term oil projects have begun in Texas that will require mat timbers and crane mats for the short- and medium-term.

There are also plenty of encouraging signs in the crosstie market. After a difficult period for those cutting ties, treaters are known to be buying in decent numbers again, suggesting Southern green mills who "rode it out" could be set to benefit. The concern treaters have is the state of log inventories in this and other regions. While some area mills are sitting on strong pre-winter log piles, others are notably thinner, leading to worries that tie supply may not be able to meet early 2027 demand from the railways.

ASH: Contacts say that the market for green and kiln dried Southern Ash is well-balanced right now. International interest in Southern Ash is not strong, with few survey respondents highlighting it as a good seller. The only price changes this week are increases to the listings for kiln dried 4/4 #1C and decreases to the listings and ranges for 4/4 #2A.

SOFT MAPLE: Secondary manufacturers who use wormy Soft Maple and some yards that resell it are buying decent quantities. Reported prices drive increases for green WHND 6/4 and 8/4 #1C&Btr Soft Maple, and the 5/4 #1C listing also advances.

#2A&3A OAK: Truck trailer flooring plants are known to be purchasing consistent volumes of #2A&3A Red and White Oak, though available supplies are so far covering that demand. There has been an uptick in demand from

residential flooring plants too, but, likewise, their needs are being met by those sawmills cutting #2A&3A.

RED OAK: There has been little price movement for green or kiln dried Red Oak of late, revealing a marketplace where production and consumption are well balanced. On the green side, observed prices drive \$10 per thousand board foot (\$/MBF) bumps to the 5/4 through 8/4 #1C listings. On the dry side of the equation, the only changes are reductions to the lower ends of the ranges for 4/4 #1C. International buyers, especially those in China, have backed off Red Oak in recent months.

WHITE OAK: White Oak finds itself in a similar position as Red Oak in the South. Demand is decent but adequately covered by available supply. Contacts have talked up #1C&Btr activity lately, but observed prices show that most business is well covered by the *HMR* listings and ranges. Decreases to both ends of the ranges for 4/4 #2A represent the only price changes for White Oak in the South this week.

POPLAR: Vietnamese buyers continue to purchase Poplar from Southern sawmills, but cooling interest from China has impacted the market. As a result, domestic secondary manufacturers that utilize the species are finding supplies readily available. Reported prices drive down the listings and lower ends of the ranges for kiln dried 4/4 #1C.

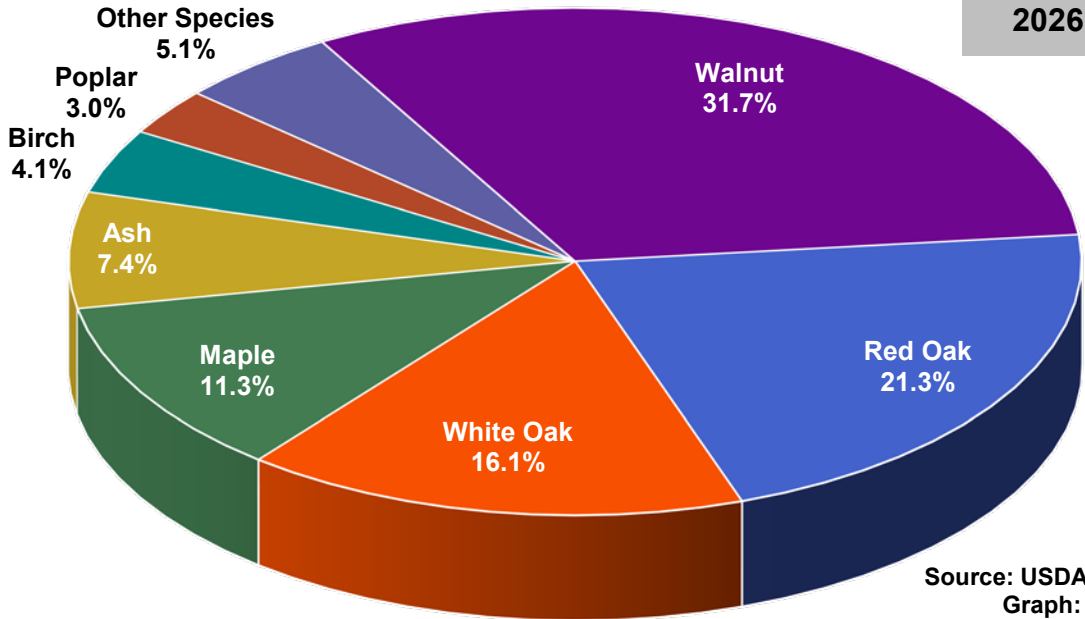

BOARD ROAD, FRAMESTOCK, CANTS & TIES: The industrial sector in the South is the region's clear bright spot at the moment, including a high-performing mat timber market. Prices in observed business raise the listing and range for board road yet again, reflecting robust demand from several large industrial projects across the region. Over the last month, the listing for board road has increased \$100/MBF.

Tie quotas continue to be loosened across the South as the crosstie picture brightens. Reported prices lead to an increase to the upper end of the crosstie range West of the Mississippi. The hardwood pallet cant market remains relatively slow compared to the Northern and Appalachian regions, resulting in no price changes to cants this week.

There has been an uptick in demand for framestock from some Southern furniture manufacturers. Observed business bears this out, prompting increases to the bottom and top sides of the range for Mixed Species framestock.

Comments

One year ago this week, we said global trade and economic uncertainties were negatively impacting hardwood lumber demand, production, and sales. Fast-forward to the present, and it is more of the same, plus the impacts of the US-Iran war on exports to Middle Eastern markets, fuel prices, and shipping rates. And, on September 16th, the Federal Reserve raised its benchmark interest rate by a one quarter of a percentage point, marking the first rate increase in three years, aimed at fighting inflation. There are several recent economic positives, however. The US unemployment rate stood at 4.1% in August and has trended lower all year. Though not keeping pace with inflation, average hourly earnings are up 3.1%. Lastly, activity in the US manufacturing sector expanded for the eighth consecutive month in August.

ASH: Sales activity for Ash is good. Some yards wish they had more to sell, but production at the sawmill level is constrained by the limited availability of sawable logs. Most developing green production moves quickly, keeping the majority of listings unchanged. However, information reduces the listings for 8/4 Fas&1f by \$15 per thousand board feet (\$/MBF). Exports continue to drive kiln dried Ash sales. Upward bias is evident in reported 4/4 #1C and #2A prices, and the listings advance. Conversely, the noted range figures for 5/4 #1C&Btr and 8/4 Fas lose ground.

BASSWOOD: Demand for Basswood is sluggish, which is apparent in the limited number of transactions reported recently. Information is sufficient to keep all green figures intact but lowers the kiln dried 4/4 Fas listings by \$25/MBF.

CHERRY: Cherry orders remain elusive from most domestic end users and distributors. Additionally, Chinese demand is off compared to solid spring and early-summer levels. Mills are more cautious with sawing and yards are more cautious with purchasing Cherry in this slower-demand environment. The listings for green 4/4 #1C&Btr and 5/4 #1C warrant reductions in the Appalachian subregion, but all green North Central figures remain intact. Kiln dried transactions reveal lower sales prices, primarily for 4/4 and 8/4 stock. The listings and noted ranges retreat for 4/4 Fas, 6/4 Fas, and 8/4 #1C in both subregions.

HICKORY: Hickory remains a strong item, with the residential flooring industry among the largest domestic consumers of this species. Monthly sales volumes of green #2B&Btr have been trending slightly higher in the second half of 2026. The listings for 4/4 through 8/4 #2A and #2B are raised \$10/MBF. Reports about kiln dried Hickory

(Continued on Page 9)

APPALACHIAN COMMENTS (Cont'd from Page 7)

sales are enthusiastic, yet newly gathered prices yield no changes to the 4/4 listings and ranges in this edition.

HARD MAPLE: Price decreases are prevalent in reported kiln dried 4/4 through 6/4 Fas prices this week, warranting reductions to the listings for both #1&2 White and Unselected stock. The ranges for Unselected 4/4 and 5/4 Fas also fall back. Meanwhile, common-grade prices are consistent with prior weeks. In green, low production is generally aligned with sluggish demand. The 8/4 #1C listings edge down in both color classifications, but all the other listings hold steady.

SOFT MAPLE: Market conditions for Soft Maple are a bit more favorable this week than last, from a seller's perspective. Some contacts now list #1C&Btr among their bestselling items, although the species hasn't altogether disappeared from certain sellers' lists of worst-moving items. Observed prices lower the listings for green 5/4 Fas&1f in each color designation. For kiln dried stock, downward bias is evident in reported 4/4 and 8/4 prices. The listings and noted ranges for 4/4 #1C and 8/4 #2A are lowered in each color sort. The low-end ranges for Sap&Btr 4/4 Fas also slip, while the high-end ranges for Unselected 6/4 Fas are raised.

#2A&3A OAK: Certain residential flooring plants increased #2A&3A Red Oak purchases in recent months,

with the trend carrying over into September. Truck trailer flooring manufacturers made broad monthly purchasing adjustments in the first half of the year, but second-half volumes have thus far been more consistent. Reported and observed information points out increases that lift the listings for 4/4 #2A&3A and 4/4 #2A Alone Red Oak. This marks the first increases since October 2025 and follows 14 consecutive weeks of stability. Demand for 4/4 #3A White Oak lags supply—impacted by slow sales of No. 2Com White Oak flooring relative to other grades—and the listing is reduced by \$10/MBF.

RED OAK: Lower demand from China is adding downward price pressure for certain kiln dried Red Oak items. The same is true of the US-Iran war's impact on shipments of thicker-stock Red Oak to the Middle East, with one exporter describing the war as "crippling" to his 8/4 Fas Red Oak sales. Domestic demand has not been sufficient to offset contractions in exports, and prices have slipped. While previous reductions have most of the published figures in order, the 4/4 #2A listings and high-end ranges are reduced, as are the listings for 5/4 #1C. Reported green prices lower the listing for 5/4 #1C&Btr and 4/4 #1C. However, upward momentum in 4/4 #2A&3A prices lifts those listings alongside the listing for 4/4 #2A Alone Red Oak.

WHITE OAK: Kiln dried Fas White Oak is a bestselling item for several producers and has been all year. Excess

Prices in this matrix are for kiln dried lumber **measured after kiln drying ("net tally")**. APPALACHIAN COMMENTS (Cont'd from Page 9)

supply relative to demand has accounted for most price decreases. This week, the 4/4 and 8/4 Fas listings are reduced, and the high-end ranges for 6/4 Fas, 4/4 #1C, and 5/4 #2A also decline. Meanwhile, higher reported prices boost the 8/4 #1C listings. Markets are absorbing sizeable volumes of green production. However, viewed purchase orders show declining prices for 6/4 #1C&Btr and 4/4 #3A that necessitate reductions to the listings.

POPLAR: Green Poplar sales are stable across most grades and thicknesses, with the species moving to mill-work and moulding operations and concentration yards at steady prices. All the green figures remain intact. Despite some recent reports of steady-to-stronger kiln dried 4/4 Fas Poplar sales, prices gathered for this issue show erosion, and the listings fall by \$25/MBF. Information also warrants reductions to the 4/4 #1C listings and low-end ranges.

WALNUT: According to most Walnut producers, Fas is the slowest grade, while demand is best for #2A, followed by #1C. US exports of Walnut lumber were 6% ahead of the year-ago pace through July, supported by brisk Q2 shipments. However, July exports were the second lowest of the year, beating only January. Meanwhile, Walnut log exports were 59% higher on the year through July, easily pacing at an all-time annual high. Contacts indicate Asian mills are primarily sawing thicker lumber from US Wal-

nut logs, and that supply is downwardly pressuring certain thick-stock prices. Information lowers the listings for kiln dried 4/4 Fas and 6/4 #2A. In green, the 5/4 and 6/4 Fas&1f listings fall back on lower reported prices, whereas a \$10/MBF increase is warranted for 6/4 #2A.

FRAMESTOCK, CANTS, TIES, & BOARD ROAD:

Upholstered furniture manufacturers are placing few orders for solid hardwood framestock. Among respondents who replied to the upholstered furniture sector portion of surveys over the last three weeks, 75% reported slow demand. Limited reported transactions keep the Oak and Mixed Species framestock ranges intact, however.

Wood pallet manufacturing operations are not overwhelmed with inventory. As such, in recent weeks, most are purchasing steady-to-stronger cant volumes. The cant listing and range accurately reflect reported prices.

Inventories of 7x9 crossties at treating plants are sufficient to meet current demand. However, buyers are growing concerned about sawmills’ ability to meet their needs in the months ahead. For now, reported prices are within the respective ranges across both subregions.

Demand for board road produced in the Appalachian region is better for some producers and lower for others but broadly lacks the upward momentum occurring in the South. Prices are well represented by the listing and range.

Comments

HMR was on the road last week, attending the NHLA Convention in Cleveland, Ohio. The keynote speaker, Connor Lokar of ITR Economics, opened the event by providing a macro-overview of the economic factors affecting hardwood. He was realistic about the challenges facing the industry but noted that there might be some light at the end of the tunnel in terms of a housing market rebound. He also made the resonant point that it might be time for producers to accept the fact that hardwood is a luxury product and focus specifically on selling to high-earning consumers.

The talk among market participants was focused on the issues you'd expect; log exports to Vietnam and China, sky-high diesel prices, and the structural decline in demand for grade lumber. Many attendees were also concerned about the escalating tariff war between the US and Canada.

During the *Global Markets & the Future of American Hardwood* session, AHEC Executive Director Mike Snow examined the log export issue, along with the decline in

(Continued on Page 14)

NORTHERN COMMENTS (Cont'd from Page 13)

lumber exports to China. At the same time, he highlighted the potential of India as a growth market for American hardwoods and touted the industry's preparedness for the upcoming EUDR regulations.

All in all, while the mood was certainly not jubilant, there was a feeling that perhaps the worst has passed and that if "you've made it this far," then you should be able to survive until an upturn in market conditions arrives.

Notable in the Northern region this week are numerous reports from market participants about limited log availability due to rainy weather and mud. While this isn't true everywhere, pockets of the region are currently lacking supplies.

ASH: Tight supply and good demand are providing consistent upward pressure to Ash prices in the Northern region. Higher reported prices lift the kiln dried net Fas listing and range numbers by \$50/MBF, while the #1C listings and high-end range numbers also rise. The species has been moving well domestically and for export to China for the past several months. Green listings are steady this week but prices are firming, as demand seems likely to keep outpacing ever-shrinking supply. Reported prices show that green Ash prices are especially firm in Eastern Canada, even more so than the Upper Midwest.

ASPEN: The Northern Aspen market is well-balanced right now, according to market participants, and all green and kiln dried listings and ranges are unchanged this week. There's not much Aspen being produced currently, and demand was strong enough during the first half of the year to push prices higher. Contacts continued to report consistent inquiries for the species during most of the summer. Some have still listed it as a best-seller in the past few weeks, but other producers have been struggling to move it and are lowering their offer prices. One producer in the Upper Midwest told *HMR/Fastmarkets* that it's currently difficult to get low-grade Aspen logs because most of them are going into industrials.

BASSWOOD: Basswood isn't moving well for most Northern producers. Privately owned housing completions were down 27.1% year over year in August, according to the US Census Bureau. This drop is limiting demand for window treatments, the key driver of Basswood demand. However, production of the species has been

tight enough to maintain steady-to-firmer prices over the past six months. This week, no adjustments are necessary for any green or kiln dried numbers.

BIRCH: The green #2A Birch listings are raised across thicknesses this week. Low-grade green lumber availability is being restricted by the red-hot pallet cant and improving rail tie markets, which are eating into supplies. All other green and kiln dried listings and ranges are flat. Prices for #1C&Btr Birch have been under consistent downward pressure throughout this year. Producers are struggling to move the species. Unselected kiln dried loads have almost no market anymore, as buyers are interested mainly in Sap&Btr lumber. One producer in the Upper Midwest told *HMR/Fastmarkets* that recently they've been preferring to sell Birch logs rather than cutting them into lumber.

HARD MAPLE: The mood in the Northern kiln dried Hard Maple market has shifted to a decidedly negative one from a producer's perspective. What had been the most commonly listed best-seller throughout the summer is now more prevalent as a worst-seller, according to market surveys. Kiln dried Fas is oversupplied in the region, according to contacts, and the green 4/4 Fas&Sel listings are lowered again in both color sorts. Markets for kiln dried #1C and #2A are more balanced by comparison. Prior decreases have all kiln dried figures in order.

SOFT MAPLE: Northern producers have been struggling to move Soft Maple nearly all year, and that hasn't changed recently. It's been the most commonly listed worst-seller in the past few weeks. Weakness toward the bottom of the kiln dried Sap&Btr 4/4 Fas market drops the low ends of those ranges, though the listings hold steady for a third straight week following persistent declines in July and August. Otherwise, all listings and ranges, both green and kiln dried, are unchanged.

REDOAK: The green 4/4 #1C listing is lowered by \$15/MBF this week, the only adjustment to any Northern Red Oak number. Markets for green #1C&Btr Red Oak have faced oversupply since late June, leading to consistent price declines. On the dry side, prices for #1C&Btr are feeling the lack of Chinese demand. However, domestic markets remain a consistent outlet for producers, as they were throughout the summer. One kiln dried producer said he can still easily move his Fas lumber if he lowers his price, while #1C and #2A have been steady for him. One potential positive for this species would be the return of Chinese demand, which would be a much-welcome buoy for #1C&Btr business.

Prices in this matrix are for kiln dried lumber **measured after kiln drying (“net tally”)**. The first figure listed for each grade and thickness is the predominant index price; figures in parentheses are the prevailing range of index prices. Bold figures indicate change. Prices published in **Hardwood Market Report** are presented only as a guide. See statement on back page. © 2026 *Hardwood Market Report*

WHITE OAK	4/4	3950	(3550-4400)	1875 [-25]	(1700-2100)	1250	(1150-1375)

WHITE OAK: The green Fas&Sel White Oak listings fall by \$50/MBF across thicknesses this week, as the Northern market is still oversupplied with #1C&Btr lumber. And on the dry side, the 4/4 #1C listings fall. Otherwise, all other numbers are unchanged. Fas remains the best-performing kiln dried grade—those listings have been trending upward since early July—though sales prices vary widely by producer.

PALLET LUMBER, CANTS, TIES, & BOARD ROAD:

Northern producers are continuing to benefit from a solid market for pallet material, as firm demand has outstripped tight production since early June. The Northern pallet cant

listing is currently up by \$75/MBF year over year. The recent escalation of US tariffs on Canadian softwood could lend further support to the hardwood pallet cant rally by limiting supplies of softwood for the pallet sector. All Northern pallet material listings and ranges are unchanged this week.

Conditions in the tie market are stable, and the range holds steady. Producers remain off quotas amid increased purchasing at a treatment plant in Wisconsin.

The board road market in the Northern region is a bit slower than the summer but consistent, holding the listing and range steady.

OAK STRIP FLOORING

Figures in the Appalachian and Southern area columns are estimates of manufacturers' **predominant** prices for unfinished Oak strip flooring; prices in the other column are estimates of **prevailing industry ranges** of manufacturers' prices. Variations in prices are due, in part, to differences in freight, the nature of markets, volumes ordered and shipped, etc. Prices are for truckload quantities graded in accordance with rules or comparable standards set forth by NOFMA. **Prices are in US Dollars per square foot (SF) and are net of dealer discount fees and commissions.** Figures in bold print signify price changes. Prices in **Hardwood Market Report** are presented only as a guide. See statement on back page.

Flooring industry contacts have not used "hot" as an adjective to describe demand and sales the last few years, because increases from low levels of activity don't warrant that term. In those cases, descriptions tend to be "up slightly," or "not as slow." Using the word "hot" in such a circumstance may reflect a sudden upturn in market conditions. If you've been through several weeks of ten-below-zero temperatures and suddenly it's 15 degrees, it feels like a heatwave even though it's still below the 32-degree Fahrenheit threshold for freezing water.

Along those lines, the residential Oak flooring market has been on an upswing since mid-July. Finished goods items are backordered by 100,000 ft² or more at certain manufacturing operations that report backlogs by volume, and by two to three weeks at others that report backlogs by timeframe.

Demand for Sel&Btr and No. 1Com Red Oak flooring has been stronger in the second half of the year than the first, while activity for No. 2Com Red Oak has picked up more recently for some. Activity for No. 1Com and No. 2Com White Oak flooring has improved as well, warranting the

"hot" description over the last month from certain industry contacts.

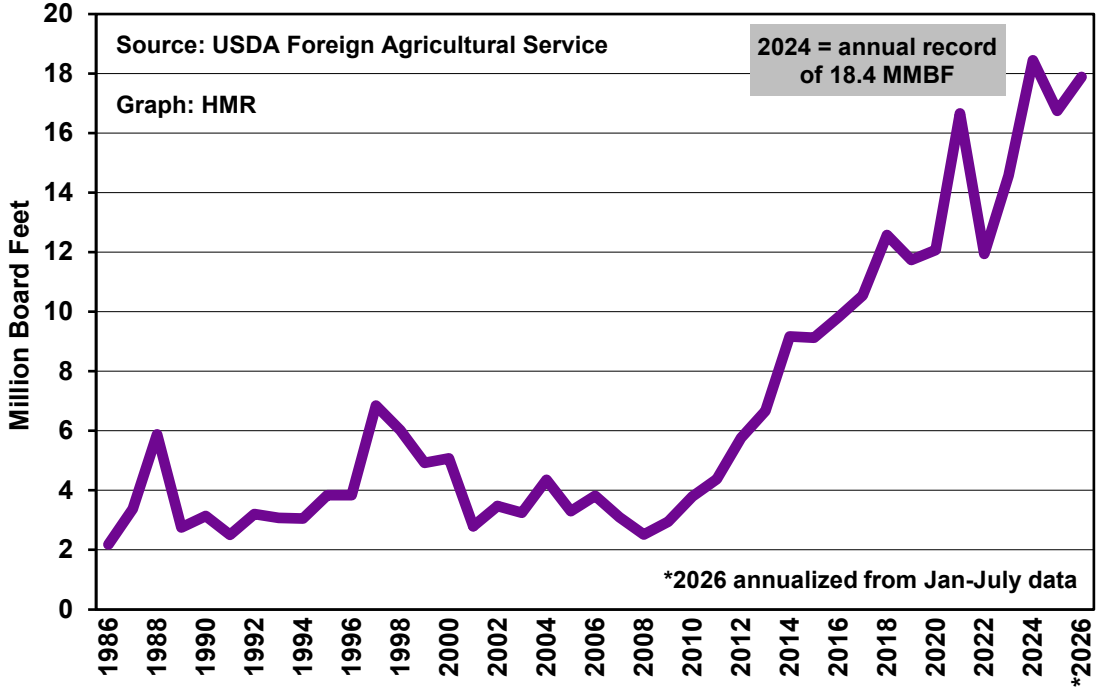

Some sellers say 2 1/4" and 3 1/4" Sel&Btr White Oak flooring are the only items that aren't oversold. Price discounting is often required to ship Sel&Btr White Oak to distributors. Overall, however, producers are feeling better about Sel&Btr White Oak inventories, including one who said his inventories have been halved since June. Sales of these items are not hot, but neither are they ice cold.

In recent years, the strong consumer preference for White Oak flooring, combined with limited production due to heavy competition for every part of the log, resulted in sharply higher White Oak flooring prices. Since then, price differences between the two Oaks have narrowed, with Sel&Btr White Oak trending lower and Red Oak trending higher. The spread between Appalachian 2 1/4" Sel&Btr White Oak and Red Oak prices is currently \$0.55. One year ago this week, the spread was \$1.10. Consumers still like the light, clean look and linear grain pattern of White Oak flooring, but the species is no longer "hot," and, unlike the past few years, flooring-grade White Oak lumber is now readily available.

Import HMR Newsletter

Now a part of
Fastmarkets

Elevated ocean freight rates, inexperienced border agents, and delays out of West African ports are the big talking points for hardwood importers. Ben Stanley looks at the issues affecting the import sector.

Our industry has stories to tell.

We're telling them.

Contribute Now to Build Your World

The Real American Hardwood Coalition has launched its Build Your World™ campaign in partnership with Magnolia Network. The ads are inspiring a national audience by educating them on the benefits of Real American Hardwood® products.

The campaign was made possible thanks to voluntary contributions from the hardwood industry. Your continued support is critical to advance the initiative and reclaim market share for the benefit of all industry stakeholders.

Help Build Your World. Learn more about the RAHC's promotion efforts, see a list of supporters, and make a voluntary, tax-deductible contribution at RealAmericanHardwood.com/industry or scan the QR code.

Fastmarkets

Stay ahead in the wood products market with Fastmarkets.

In the fast-moving world of wood products, knowledge is power. Fastmarkets' forest products deliver the trusted pricing, expert analysis and market intelligence you need to navigate the industry with confidence.

Trusted price benchmarks

Gain access to independent, data-driven price assessments for key wood product markets.

Actionable market insights

Stay informed with real-time news, trends and expert forecasts.

Supply chain transparency

Understand the dynamics of global supply, demand and trade flows.

Whether you're a supplier, manufacturer, trader or end user, Fastmarkets equips you with the insights needed to make informed decisions, mitigate risks and seize new opportunities.

Stay ahead. Stay informed. Subscribe today.
