SOUTHERN AREA

Comments

Those who cut green Hickory in the Appalachian region enjoyed an energetic price market this summer, as the species experienced multi-year highs in several grades and thicknesses. Appalachian green 4/4 Fas, for instance, is at its highest published price since September 2022.

Over recent weeks, the Appalachian trend spilled into the South, with price increases for Fas&1f and the lower grades of Pecan and Hickory. Despite elevated diesel costs, lower prices for Southern relative to Appalachian stock have made it an attractive option for buyers located in the Midwest and Mid-Atlantic regions. Southern green 4/4 Fas is now at its highest published price in *HMR* since January 2023, and green 4/4 #2A hasn't been this high since October 2023.

Overall, the market for Southern kiln dried lumber is slow, with weak export business weighing heavily on overall demand. Outside of ongoing concerns about low log supplies and the potential ramifications this winter, the main conversation point in the region is increased purchasing by tie treaters.

ASH: Like other species, the flow of Ash logs to Southern sawmills is limited. The region hasn't been as hard hit by the infestation of the Emerald Ash Borer as the Northern and Appalachian producing areas, but contacts say it has been found in tracts of Ash in the Arkansas Delta, among other places. International interest in Southern Ash is sluggish, with exporters reporting little new activity this week. Prices gathered for this issue show kiln dried business is occurring within the ranges for all thicknesses and grades, whereas the only green changes are increases to the listings for 4/4 Fas&1f.

#2A&3A OAK: Though Southern residential flooring manufacturers have controlled lumber purchases of late, the resurgent crosstie market means they are being forced to compete for a similar part of the log that sawmills are moving in larger volumes to tie treaters. What is more, truck trailer flooring producers as well as flooring plants in the Appalachian region continue to buy sizeable volumes of Southern #2A&3A Oak, particularly Red Oak. Log supply issues in the South are impacting Red Oak more than White Oak as well. As a result, observed prices for 4/4 #2A&3A Red Oak trended up this week, necessitating increases to the listings. All other #2A&3A Red Oak and White Oak listings remain stable.

RED OAK: Many Southern sawmills are dealing with log shortages. Compared to the amounts they would like to have on hand, mills are having more difficulty procuring Red Oak than White Oak logs. Several factors, including revitalized demand and firming prices for crossties, are bumping up green 4/4 #2A&3A prices, as reflected in increases to those listings. Combined domestic and international demand for kiln dried Red Oak is only fair, at best.

WHITE OAK: Those cutting or drying White Oak have endured difficult markets in 2026. The species has had a few periods of apparent improvement, but weak demand from China has been a consistent drag on business all year. All green and kiln dried listings and ranges stand pat this week.

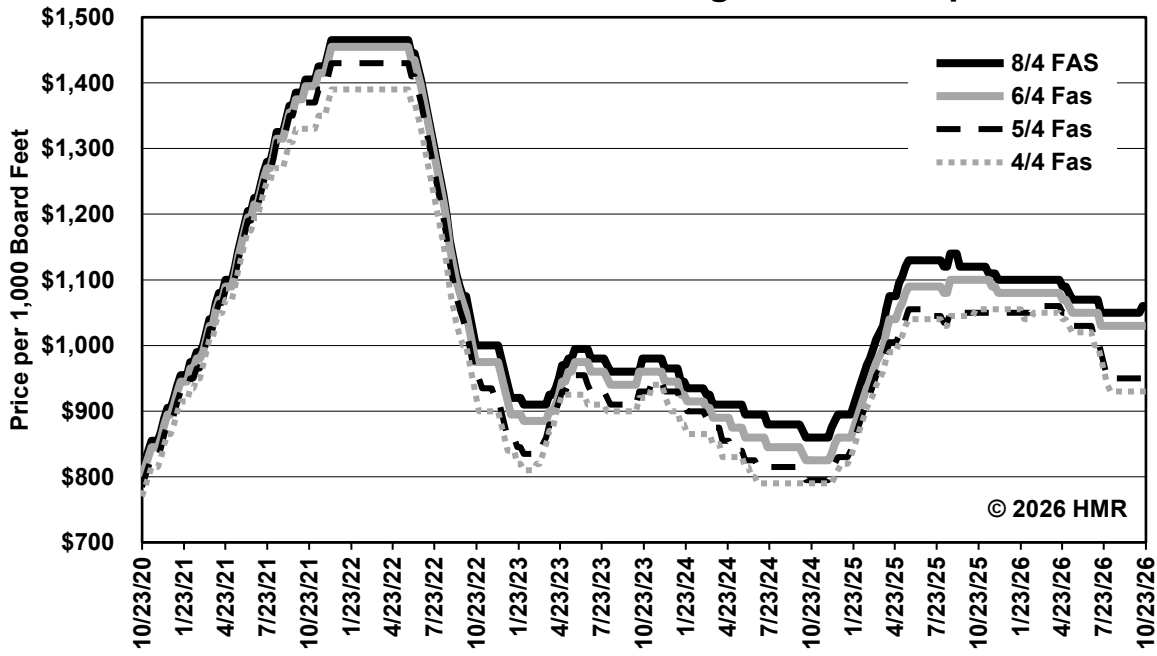

PECAN & HICKORY: One could make the case that Pecan & Hickory are the South's stars at present. Several survey respondents identify an uptick in demand for green 4/4 stocks, including elevated interest from flooring plants. Observed transactions back this up, driving increases to the listings for 4/4 Fas&1f, 5/4 Fas&1f, and all #2A and #2B items.

POPLAR: Secondary manufacturers are purchasing additional green #1C&Btr Poplar, though reported Fas&1f prices remain grouped around the *HMR* listings. However, the increase in #1C activity results in higher prices that lift the 4/4 and 5/4 #1C listings. International demand for Poplar is not very strong. One Mississippi contact said that orders from Asia are available but have become less frequent. The kiln dried 6/4 Fas listings lose ground.

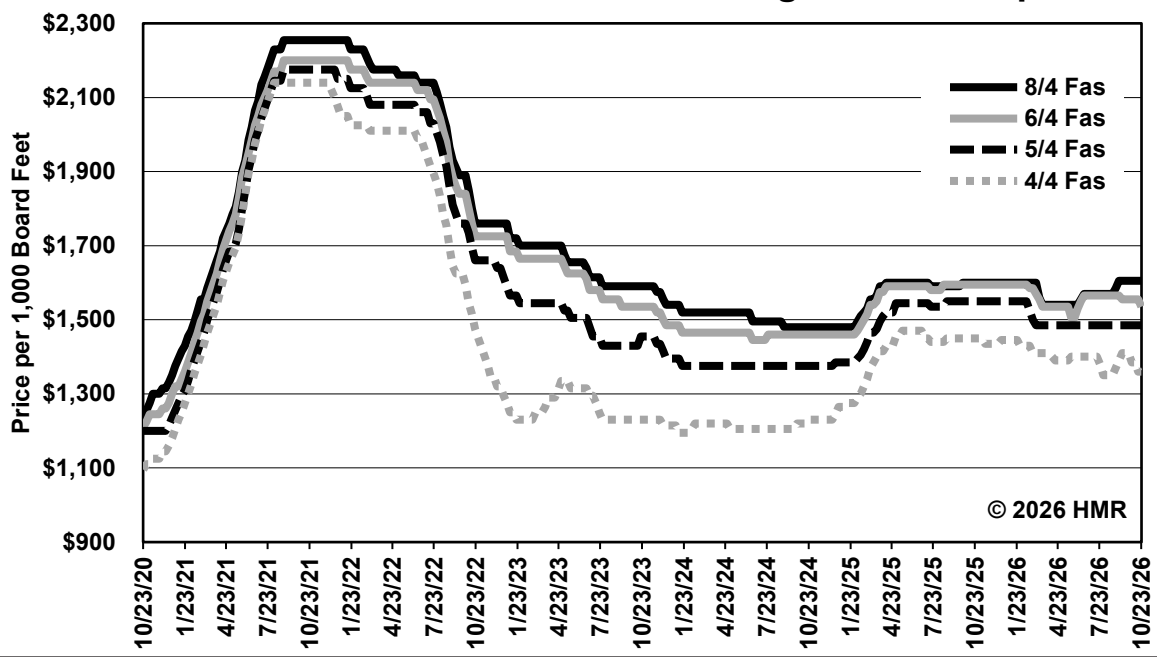

BOARD ROAD, FRAMESTOCK, CANTS & TIES: Sawmill operators are welcoming the warming crosstie market. Crossties have traditionally been one of the backbones of the hardwood industry, meaning reduced purchasing by tie treaters left sawmillers with reduced avenues for staple products. There are no changes to the range for 7x9 crossties west of the Mississippi in this edition, but information raises the upper end of the range east of the river.

The pallet cant market has stabilized after increases to the listing and range last week. Thanks to large-scale oil projects in Texas, there is still plenty of energy in the mat timber and board road market, although reported board road prices are accommodated by the published range. The Oak and Mixed Species framestock ranges also stand pat.

Comments

Log decks are low across parts of the region, with several mills reportedly shut down due to a lack of logs. Business is inconsistent. Activity is good for two to three days in a row then slow for the next three to four days, contacts report. Incoming orders at mills with enough logs to saw full loads of lumber are increasingly length specific across a growing number of species. Stricter order specifications are indicative of a buyer's market, with sellers continually adjusting to nuances in orders.

Producers tired of "eating" elevated freight costs are having some success passing a portion of those costs on to buyers, but this is not the norm across the region. One green sawmiller said his freight cost to a regular customer several states away has risen by \$1,300 this year, while another said diesel prices for his trucking fleet are "killing us," adding, "Customers don't want to give extra for freight." However, another green mill manager said he asked for, and received, a \$15/MBF increase for his cants from a regular customer who agreed to help offset his cost increases. Similarly, an exporting yard owner reports larger customers in the Middle East are paying extra freight costs because their Red Oak inventories are almost wiped out.

ASH: Ash sales are relatively easy in a tough overall market. Limited supply is supporting pricing for those mills

that have enough logs to cut full loads of Ash. Put another way, one seller said his customers don't haggle over Ash prices because they know there's not much out there. Mills with few Ash logs are putting their limited production into mixed loads. Information raises the listings for kiln dried 4/4 #1C and ranges for 6/4 Fas.

BASSWOOD: End-users aren't clamoring for more Basswood. Accordingly, sawmillers aren't prioritizing production. All green and kiln dried figures remain intact.

CHERRY: Cherry is disappearing from sellers' lists of best-moving species, yet it isn't appearing on lists of worst-moving items. Trade data confirm what exporters have frequently reported: Cherry shipments to China slowed in August, to the lowest monthly volume of the year, and have remained sluggish since. Producers have worked to offset lower demand by curbing production, but the balance still tilts toward excess supplies of certain items. Information lowers the green Appalachian 4/4 #1C listing and the 4/4 #2A and #3A listings in both subregions. For kiln dried North Central Cherry, reductions are warranted to the listings and noted range figures for 4/4 through 6/4 #1C and to the low-end ranges for 5/4

(Continued on Page 9)

APPALACHIAN COMMENTS (Cont'd from Page 7)

Fas, whereas the low-end ranges for 4/4 and 6/4 Fas gain ground. Also, downward bias is evident in reported Appalachian 5/4 #1C prices, and the listings and ranges decline.

HICKORY: Most Hickory grades and thicknesses are selling well. In fact, it is the best-moving species for certain sellers. No changes are warranted to any green or kiln dried figures in this edition.

HARD MAPLE: Overall Hard Maple business is lukewarm, but activity is better for the commons than for the upper grades. Consistent volumes are moving to long-term customers, but open market sales are harder to generate. Reported green prices prompt reductions to the listings for 5/4 through 8/4 Fas&lf in both color sorts, whereas reported kiln dried prices keep all published figures intact.

SOFT MAPLE: Buyers are controlling Soft Maple purchases to meet short-term needs. Production is similarly constrained in this tepid demand environment. Contacts report slower sales of uppers than commons. Green production currently meets the market's needs, and all the listings stand pat. Meanwhile, slightly higher reported prices lift the kiln dried Sap&Btr and Unselected 4/4 #1C listings.

#2A&3A OAK: Residential flooring plants want more #2A&3A Red Oak lumber to support decent Red Oak flooring business, but they are receiving as much #2A&3A

White Oak as needed, if not too much. Meanwhile, demand is steady from most truck trailer flooring producers. Flooring manufacturers are facing renewed competition for raw materials from tie treaters, who are increasing crosstie purchases. Increased board road and crane mat output is also impacting Red Oak availability, as are brisk sales of pallet cants in certain areas. Reported prices for #2A&3A and #2A Alone Red Oak show signs of firming but do not yet warrant changes to the listings. The #2A&3A White Oak listings also carry over from last week.

RED OAK: Domestic demand for Red Oak is fair, but Chinese markets are cool, and European demand is flat. Red Oak sales to the Middle East have improved for some exporters but not others. Competitive pressures are evident in reported kiln dried 4/4 Fas prices, and the listings are reduced by \$20 per thousand board feet (\$/MBF). Meanwhile, green 4/4, 6/4, and 8/4 Fas&lf production exceeds the market's needs, prompting reductions to the listings.

WHITE OAK: Green 4/4 Fas&lf and 5/4 #3A&Btr White Oak are selling well, while 4/4 #2A&3A are widely available and moving in lower volumes to residential flooring manufacturers, according to surveys and conversations with sellers and buyers. Lower prices in observed activity drive reductions to the green 6/4 and 8/4 #1C listings. Kiln dried Fas sales are length-dependent, prompting a wide range of reported prices. Supplies of most random-width

(Continued on Page 11)

APPALACHIAN COMMENTS (Cont'd from Page 9)

and -length White Oak items are aligned with demand, keeping most figures unchanged. However, observed prices warrant reductions to the listings for 5/4 #1C and high-end ranges for 8/4 Fas. Sales of 8-foot Fas White Oak have picked up for some sellers of late.

POPLAR: Reports about kiln dried Poplar inventories range from slightly oversupplied to slightly undersupplied relative to demand. Contacts note weaker demand for #1C and #2A than for Fas, mainly because of lack-luster purchasing by Chinese and Vietnamese furniture manufacturers. However, nearly all the published figures are unchanged from last week, suggesting supply and demand are well balanced. The only changes lift the low-end ranges for 4/4 Fas. Green Fas&1f is moving slower than some producers would like. The 12/4 and 16/4 Fas&1f listings edge down, while all the other listings remain intact.

WALNUT: Changes in Vietnam and China are fundamentally transforming the Walnut lumber market. Contacts say Chinese and other foreign buyers are purchasing more Walnut lumber produced in China and Vietnam from US logs, and, consequently, less from US suppliers. US exports of Walnut lumber to China were 22% lower on the year through August. At the same time, Walnut log exports to China have doubled so far in 2026 over 2025 but are not back to 2021 through 2024 levels. US exports of

Walnut logs to Vietnam increased 13-fold in 2025 to 70.0 MMBF and were up another 47% on the year through August 2026. That said, no changes are warranted to any kiln dried price figures in this edition. Reported green prices prompt increases to the 5/4 #1C&Btr and 6/4 #2A listings but a reduction to the 4/4 #2A listing.

FRAMESTOCK, CANTS, TIES, & BOARD ROAD:

Most sellers are not carrying large framestock inventories because demand from the furniture sector—while better this year due to duties on plywood imports—isn’t good overall. Transactions this week point out slightly higher prices that lift the high ends of the Oak and Mixed Species ranges.

Pallet manufacturers report steady to slightly lower lumber supplies, decent sales, and adequate finished goods inventories. Cant production moves without issues. Prices are well represented by the listing and range.

Tie production and purchases are increasing from low levels, as quotas imposed by treaters have been removed. Treating yards are paying higher prices to certain 7x9 crosstie suppliers, but the increases are occurring within the existing range for each subregion. As such, the ranges hold steady at previously published levels.

Board road markets are fair to somewhat busier and are absorbing production from regular suppliers. No changes are required to the listing or range.

Comments

It's been a rather slow start to the fall in the North, as nearly all producers recently surveyed by *HMR/Fastmarkets* have described both green and kiln dried lumber sales as "fair" or "slow." Industrials remain just about the only positive for producers, though those markets are more of a life raft than a rocket ship, especially for green mills.

Log supply is constricting further in the region. This will be something to watch going into winter, especially when it comes to low-grade and industrial lumber markets, where supplies are already tight. Many market partici-

pants are bullish on pallet cant and rail ties prices, even after sizable gains in the summer and early fall.

ASH: Limited production due to the Emerald Ash Borer combined with solid demand continue to support Ash prices in the Northern region. Producers in Eastern Canada have been reporting especially firm prices, even more so than those in the Upper Midwest. Contacts are receiving consistent inquiries for the species domestically and

(Continued on Page 14)

NORTHERN COMMENTS (Cont'd from Page 13)

are also moving sizeable volumes to China. This has been the case throughout most of this year. In this issue, reported prices necessitate increases to the kiln dried 4/4 #1C listings and low-end range numbers. All other listings and ranges are unchanged.

ASPEN: Supply tightness caused by persistent low production is keeping Aspen prices firm. Upward bias is evident in kiln dried #1C prices, driving increases to those listings and the lower ends of the ranges. No other adjustments are necessary at this time. The 4/4 #1C net tally listing is up by \$80 per thousand board feet (\$/MBF) since the start of 2026. All Aspen listings, both green and kiln dried, have advanced a decent amount since the year began, though these gains were largely concentrated in the first quarter. Since then, reported Aspen prices have been fairly consistent, indicating a well-balanced market. Recently, comments from producers about demand for Aspen have been a bit mixed, though leaning positive. Low-grade Aspen lumber markets are tightening due to falling log supplies and strong demand for industrial items.

BASSWOOD: The kiln dried 4/4 and 5/4 #1C Basswood listings and ranges are reduced in the Northern region. Downward pressure is especially evident toward the low end of the market, with some producers recently reporting sales prices well under the current published listings. Most producers and end users characterize demand for green Basswood in lukewarm or negative terms, as has been the case in recent months. However, limited production is helping maintain largely steady pricing. No adjustments are necessary for any green listings in this issue.

BIRCH: The green #3A Birch listings are raised across all thicknesses, their second increases since early September. Strong demand for pallet cants and crossties has been eating into production of low-grade lumber across most species, including Birch. So even though demand for Unselected Birch is muted, #2A and #3A prices for the sort have been trending higher since late summer. Otherwise, all green and kiln dried listings and ranges are unchanged. Contacts in both the Upper Midwest and Eastern Canada have been reporting good demand and firmer prices for kiln dried Sap&Btr #1C&Btr Birch, driven in part by increased purchasing by kitchen cabinet manufacturers.

HARD MAPLE: Most published Hard Maple numbers are steady this week in the North, as reported prices

prompt just a few minor adjustments to the listings. Contractions in low-grade supplies lift the green #1&2 White 4/4 #2A and Unselected 4/4 and 5/4 #2A listings. And on the dry side, prices in observed business necessitate slight decreases to the #1&2 White 6/4 #1C listings. Markets for Fas have stabilized of late, after prices slid persistently over the course of the summer. Uppers still aren't moving especially well for producers compared with earlier this year, and available supply is reportedly ample. However, for now, particularly on the green side, most producers are able to maintain steady selling prices. The green #1&2 White 4/4 Fas listing is unchanged for the fourth straight week though is currently at its lowest level since March 2024, down \$215/MBF from mid-June. #1C and #2A Hard Maple have recently been moving better than Fas, according to sales contacts, bolstered by decent demand from the flooring sector.

SOFT MAPLE: All listings for Northern kiln dried Fas Soft Maple fall again in both color sorts. The Sap&Btr 4/4 Fas net tally listing is down by \$410/MBF since late April to the lowest level in more than two years. Prices for Soft Maple uppers have been under downward pressure since the spring, as supply has consistently outstripped demand. Kiln dried declines were especially sharp during the latter part of the summer, and this has carried over into the fall. This year, many upper-grade buyers have transitioned from Soft Maple to Hard Maple. Markets are more balanced for #1C and #2A than for Fas Soft Maple, as the common grades have been moving better for producers. The kiln dried Sap&Btr #1C listings have posted just one decrease since early August, and the #2A listings have actually risen since the spring.

RED OAK: Sales of #1C&Btr Red Oak are sluggish, largely due to weak demand from China, which has persisted since the summer. The low ends of the ranges for kiln dried 4/4 and 5/4 #1C are reduced, the only adjustments to any numbers in this edition. The state of the Northern Red Oak market has been consistent over the past few months. Prices for #1C&Btr are slumping, despite solid domestic demand, because of limited exports. Meanwhile, #2A&3A prices have held steady or risen due to scarce supplies. It's hard to imagine a fundamental shift occurring until Chinese demand rebounds.

WHITE OAK: All published White Oak figures, both green and kiln dried, are unchanged in this issue. Green markets seem to have reached an equilibrium for now, as downward pressure on #1C&Btr prices has eased. The

Prices in this matrix are for kiln dried lumber **measured after kiln drying (“net tally”)**. The first figure listed for each grade and thickness is the predominant index price; figures in parentheses are the prevailing range of index prices. Bold figures indicate change. Prices published in **Hardwood Market Report** are presented only as a guide. See statement on back page. © 2026 *Hardwood Market Report*

4/4 Fas listing is unchanged for the fourth straight week, at \$2,300/MBF, and has posted just one decrease since late-July. Meanwhile, the 4/4 #1C listing rose earlier this month for the first time since June 2024. On the dry side, Fas remains the best-moving grade for producers and a real money-maker for sellers that have lots of 9-foot and longer stock to offer. Markets for #1C and #2A have been well balanced since the summer, and reported prices have mostly been steady.

PALLET LUMBER, CANTS, TIES, & BOARD ROAD:
Pallet material continues to move well for Northern producers. However, the upward price movement observed for

cants during the summer has stopped for now, as reported prices have plateaued. The 4x6 cant listing has stayed at \$580/MBF for three straight weeks and has posted only one gain since early September.

The situation for crossties is similar. Northern producers are off quotas, and most are moving as many ties as they can make. However, the high end of the range has not gained ground since early August amid consistent reported prices. Both ends of the range are again unmoved.

The board road listing and range are also flat this week amid reports of consistent market conditions in that sector.

OAK STRIP FLOORING

Figures in the Appalachian and Southern area columns are estimates of manufacturers’ **predominant** prices for unfinished Oak strip flooring; prices in the other column are estimates of **prevailing industry ranges** of manufacturers’ prices. Variations in prices are due, in part, to differences in freight, the nature of markets, volumes ordered and shipped, etc. Prices are for truckload quantities graded in accordance with rules or comparable standards set forth by NOFMA. **Prices are in US Dollars per square foot (SF) and are net of dealer discount fees and commissions.** Figures in bold print signify price changes. Prices in **Hardwood Market Report** are presented only as a guide. See statement on back page.

Shipments of solid wood flooring by US manufacturers fell 3.9% in September from August, according to estimates by HMR/Fastmarkets. Reports on shipments were accompanied by comments characterizing September sales as “uneven” following steady business through most of summer. “Demand seems to come in bursts,” a flooring plant manager said. “No one seems all that interested in buying more than they need at the moment.”

Historically, demand tends to seasonally slow around Thanksgiving, which is just over a month away. In some years, markets lose momentum earlier (mid-October or early November), due to factors such as rising prices, consumers experiencing inflationary fatigue if prices cross certain thresholds, or the early onset of wintry weather in the Northeast and Midwest disrupting shipments to distributors in those regions. Those factors aren’t in play at present, but others are. “Freight is killing everyone right now, and there seems to be an election-related slowdown, or at least that is what we are hoping is causing the latest slowdown,” a manufacturing contact said.

The let-up in demand isn’t sector-wide, however, nor is it

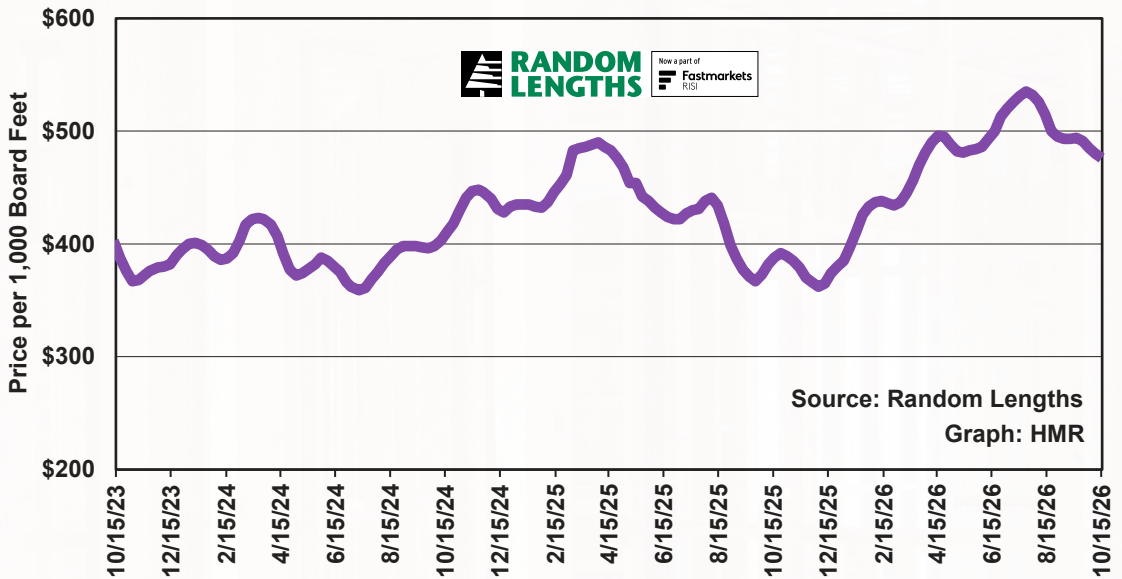

present across all species and grade combinations. A different manufacturer reported good order files in September, including backorders for 2¼” Sel&Btr Red Oak, an item he described as “the belle of the ball” in the current flooring market. Backorders also exist for No. 1Com Red and White Oak at that plant and others. Reported 2¼” No. 1Com Red Oak and White Oak prices warrant no changes to listings or ranges in either region. The 3¼” No. 1Com Red Oak and White Oak listings also hold steady, but the No. 1Com White Oak range is lowered.

Sel&Btr White Oak remains challenging to move in each width and each region. Inventories of these items are lower now than they were in the spring, but supply continues to outpace demand. The resulting downward pressure on prices prompts another round of reductions to the listings and noted ranges. Including this week’s declines, the listing for Appalachian 2¼” Sel&Btr White Oak is the lowest since March 2024, while the Southern listing is the lowest since April 2024. These downward price trends are prominent concerns for flooring manufacturers. Fortunately, from a flooring manufacturer’s standpoint, green White Oak lumber prices are flat rather than gaining traction.

STEWARDSHIP COUNCIL

PROTECTING THE FUTURE OF THE AMERICAN HARDWOOD LUMBER INDUSTRY

The American Hardwood Log Stewardship Council is working to stop unfair competition from foreign log buyers and support American hardwood lumber businesses, workers, and communities.

1. STOP UNFAIR COMPETITION

Working hard to stop unfair competition from foreign log buyers at no cost to industry members.

2. ADVOCATING IN DC

We have been traveling to DC and meeting with political members to deliver the realities of the industry.

3. REDUCE LOG EXPORT

For the first time ever, more logs were exported from the U.S. in the past year than hardwood lumber. Support efforts to level out the playing field and reduce log exports.

4. PREVENT UNFAIR TRADE PRACTICES

Many foreign log buyers are practicing unfair trade practices to undercut American businesses.

5. PROTECT OUR INDUSTRY

We need to protect the hardwood industry for national security and future generations.

6. STOP THE INDUSTRY DECLINE

Multiple primary and secondary producers are going out of business as a result of log exports.

WE NEED POWER IN NUMBERS!

CONTACT YOUR LOCAL CONGRESS MEMBER TODAY AND URGE THEM TO HELP THE HARDWOOD LUMBER INDUSTRY!

IF YOU NEED INFORMATION ON WHO YOUR LOCAL REPRESENTATIVE IS PLEASE CONTACT DREAMA REESE AT 614-462-2290 OR EMAIL DREAMAKAYREESE@GMAIL.COM BETWEEN 8A.M. - 4 P.M. MONDAY - FRIDAY
