Attention HMR Subscribers!

YARDSTICK IS OFFICIALLY HERE!

HMR subscribers can access the *Yardstick* by logging onto **hmr.com**.

Yardstick is the monthly measure of North American forest products statistics and the economic engines that power the industry.

This special, expanded publication from **Random Lengths** now covers softwoods and hardwoods.

EACH ISSUE FEATURES:

- Extensive pricing for hardwoods, softwoods, and panels
- Key market performance indicators, including production, shipments, and inventories
- US and Canadian housing information, US metropolitan areas, and Canadian provinces
- Multiple historical data tables
- Economic and financial data
- Import and Export statistics covering key forest products, source countries, and market destinations
- Hardwood and softwood chip prices
- Softwood log prices
- Data developed by and collected internally from **Random Lengths** and **HMR**, as well as from third-party industry, US government, and Canadian government sources.

When data matter, rely on
Random Lengths and HMR – A part of Fastmarkets.
